

OPERATING INSTRUCTIONS

SOLAR RAPTOR® LightBar Pro

Art.-No.: 13521, 13522, 13523

We thank you for purchasing a SOLAR RAPTOR® product and trusting our years of experience in building terrarium lighting solutions. All of our products are manufactured with the utmost care and using the latest technology.

Technical Data:

The SOLAR RAPTOR® LightBar Pro is a T5 light fixture specifically designed for terrarium applications. It consists of an integrated flicker-free electrical ballast in a high-quality aluminium housing. The SOLAR RAPTOR® LightBar Pro is safe to use even in high-humidity rainforest terrariums. The high-frequency ballast works silently and has an automatic safety shutdown triggered in case of damage to the installed lamp.

Installation:

The SOLAR RAPTOR® LightBar Pro can be screwed to a support above the terrarium using the included metal clips, or mounted to a ceiling or at similar height with a SOLAR RAPTOR® LightBar Pro CeilingRope (sold separately). The light fixture may simply be placed on top of a terrarium; however, no glass should be placed between the animal(s) and any UV-light emitting tubes if such are mounted, as regular glass blocks UV radiation.

We recommend mounting SOLAR RAPTOR® T5 UVB-Tubes, which are available in two UV-ratings and a multitude of sizes. The tubes can be used as base terrarium lighting while also emitting increased amounts of UV-B radiation, vital for the health of many reptiles.

Safety Advice:

- Before installation or maintenance, the power plug of the ballast must be disconnected from the outlet.
- In the event of damage to the product or abnormalities in operation it must be disconnected from power immediately.
- Before switching the product on, make sure the Easy Plug connections are closed correctly. The T5-mount connections must equally be screwed shut.
- Before powering on the SOLAR RAPTOR® LightBar Pro, it must be properly installed and secured against slipping or falling from its mounting place.
- The housing of the SOLAR RAPTOR® LightBar Pro may not be opened.

Cleaning:

Only clean the product with a dry cloth. Disconnect the product from power before cleaning.

Disposal:

This product is an electronic device and must be disposed of in accordance with the local laws and/or regulations pertaining the disposal of electronic devices.
